

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, May 22, 2018 – 0800 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial Attack Activity:	Light (81) new fires
New large incidents:	0
Large fires contained:	1
Uncontained large fires:**	1
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 5 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

\*1 Hectare = 2.47 Acres

**Prescribed Service Discussion:** An area of low pressure over the West will bring cooler temperatures and more precipitation to the northwestern quarter of the country and a mix of dry and marginally wet storms to the central Great Basin and points south. Expect scattered showers and wet storms in these areas to expand in coverage during the afternoon period. Breezy southwesterly winds and low humidities will create critical fire weather conditions across southern Nevada, Arizona, and western New Mexico. The stormy, wet pattern will continue across the East as the weak tropical low continues to drift southward toward the Floridian Panhandle. In Alaska, above average temperatures will continue across the interior with isolated showers and storms possible.

## Aviation Mishap Response

*Aviation Category*

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
  - Preserve life. Rescuers first!!!
  - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
  - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
  - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.

**Activity:** *Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.*
